

# THE INDUSTRIAL REVOLUTION

## Teacher notes

This CD-Rom is suitable for use with Year 9. It contains a great deal about the revolution, but a large amount of information is audio based. For this reason, two functions of the CD-Rom will result in the best classroom use – the Glossary and the Quiz.

Two worksheets are provided with different exercises. One with the glossary exercise, which provides instructions to load and utilise the CD-Rom glossary. The second provides instructions to use the quiz function. Here pupils are presented with visual material, and relevant questions with 4 multiple choice answers. 20 'random-ish' questions are asked in 10 minutes (but most should take under that time). The worksheet is suitable for both single pupils or groups of 3-4, and the computer provides the assessment. An element of competition is available by seeing which groups can get them all correct!

The additional advantage of this CD-Rom is after the quiz. The worksheet directs pupils to investigate their incorrect answers. By following the on-screen instructions they are able to get explanations why their answer was incorrect, and the reasons for the correct answer. This can be an extremely effective learning tool.

### Preparations.

1. Put the CD-Rom into the CD drive, and a start-up screen should appear:
2. Simply click on
3. The worksheets give pupils instructions on how to begin each exercise from the main title screen.

If the start-up screen fails to appear, select  Start and then  Programs  
Then find and click on  PowerCD and select  PowerCD
