

# THE MEN OF THE RENAISSANCE

Study the list of points on this sheet about the life and work of Pare, Harvey and Vesalius. In the three columns that your teacher will have told you to draw, write out each one into what you think is the correct column. Use the textbooks to help you find the information before you make your decisions if you need to.

By Mr Welsh

[www.SchoolHistory.co.uk](http://www.SchoolHistory.co.uk)

Born in 1510 in France

Born in 1578 in England

Born in 1514 in Belgium

Studied medicine in Paris and Padua

Trained as a barber surgeon by his brother

Studied medicine at Cambridge and Padua

He stole a corpse as a young man so that he could study the human body

In 1536 he became an army surgeon

Worked as a doctor in London

His specialism was surgery

His specialism was anatomy

His specialism was the heart

Showed that blood flows around the body in a one way system

Developed an ointment that was used to stop wounds getting infected

Wrote a book called *The Fabric of the Human Body*

Wrote a book called *On the Motion of the Heart and Blood*

Wrote a book called *Works on Surgery*

Proved the human jaw has only one bone

His book contained accurate drawings of what the human body looked like

He corrected some of the mistakes of Galen

Developed a new technique for stopping serious bleeding using silk threads that were called ligatures

Proved that the heart works like a pump

Showed that the human liver has two lobes and not five as Galen had said

More people survived because of his work

He measured the amount of blood in each heartbeat

At first his work was criticised by some scholars

He showed that blood does not pass from one side of the heart to another

He died in 1657

He died in 1590

He died in 1564
