

What did white America think of the Native Americans?

Instructions: The lifestyles of Native Americans was very different to that of white Americans. For each of the differences, explain what white Americans would have thought about the Indians. Then explain **why** the Indians did this. The first example has been done for you.

Tipis

These Indian folk live in tents, this just shows that their skills are very limited. They must be less intelligent than us if they can't build proper houses. Homes need to be made out of wood or bricks and they need separate rooms for privacy. Its disgusting to think that they all sleep so close together. Can you imagine how cold it must get in winter. I bet many children and old people die every winter.

Tipis
